

Cassette & Jar of Derivatizing Solution

The items pictured here are available in two package sizes  
Available in a pack of four units and in a pack of ten units.

They come in a package designed for transport to and from the field

**Included in the package are:**

- Copy of the sampling protocol,
- MSDS sheets for the various chemicals involved (3)
- Return shipping instructions and hazardous material labels to be used for shipping back to lab via ground transport.
- Sample Record chain of custody form to capture sample particulars

## ORDERING INFORMATION

4 - Pack Cat # **V-ISO-4NT**  
10 - Pack Cat # **V-ISO-10NT**

Note that a blank is required for each set of samples  
So a 10 pack allows for a maximum of 9 samples to be taken, and a 4 pack a maximum of 3 samples to be taken.

We can drop ship the items anywhere in the USA , Hawaii and Alaska for an additional \$10 fee.  
Note the material can not be air shipped without a hazardous preparation charge, at the time of this writing, the hazardous air-shipping container preparation charge is \$125 for 1-3 packages, plus a \$48 charge shipper (Fedex) handling charge plus what ever the air shipment costs are from Chelmsford MA to the destination. Overseas costs about \$350 for each shipment, just for shipping container prep charge. These cost are dictated by the DOT and IATA are not charges that Omega Specialty imposes.
